PROFESSIONAL EXPERIENCE

Data Analyst & Dashboard Developer | Upwork (Remote) | Apr 2025 - Present

- Top Rated freelancer (100% Job Success Score): 6+ clients across healthcare, sales and finance, 10+ completed jobs with returning clients and 5-star reviews.
- Design and develop interactive dashboards in Tableau and Looker Studio and deliver data analysis in Python, turning complex datasets into clear KPI reporting and actionable insights.
- Gather requirements across time zones, clean and transform data, and present findings to technical and non-technical stakeholders.

Tableau Data Analyst (Contract) | Geowise Technology Company, Saudi Arabia (Remote) | Oct 2025 - Feb 2026

- Contracted via Upwork and completed a 3-page clinical Tableau dashboard from patient-level data covering demographics, vital-sign trends, blood-pressure classifications and key clinical KPIs.
- Cleaned and validated the data with SQL, Tableau and Python and clarified reporting requirements with stakeholders to improve the accuracy of clinical reporting.

Staff Registered Nurse | St Andrews Hospital, Nigeria (On-site) | Mar 2022 - Jun 2023

- Provided nursing care in the Renal and Outpatient departments (about 5 patients per shift), including medication administration, wound care, IV placement and vital-sign monitoring.
- Acted as charge nurse, coordinating the nursing team and patient flow on busy shifts and working with physicians, therapists and social workers on patient care plans.
- Used EHR, patient monitoring and telehealth systems for accurate documentation; educated patients and families on disease management and post-hospital care.

PROJECTS

Emergency Room Visits Analysis Dashboard | Tableau

- Analyzed 5,000+ emergency room records to evaluate patient volume, wait times, throughput, peak-hour demand and staffing patterns.
- Built a 4-KPI interactive dashboard with parameters and dashboard actions to find patient-flow bottlenecks and a 6% variation in wait times.

Outpatient (OPD) No-Show Rate and Claims Analysis Dashboard | Tableau

- Analyzed 10,000 outpatient encounters and claims records, identifying a 23.8% no-show rate in Q3 and a 67% no-show rate on Sundays.
- Combined no-show, patient-flow, utilization and claims KPIs with drill-downs to pinpoint high-risk periods and reduce missed appointments.

Patient Readmission Prediction | Python, Machine Learning, Streamlit

- Built a machine learning model with 95% accuracy to predict readmission risk from 5,000 patient records (precision, recall, F1, ROC-AUC).
- Deployed the model as an interactive Streamlit app for real-time risk prediction and documented the full workflow on GitHub.
